

HEAD SPLITTER FOR BEEF ELECTRICAL-HYDRAULIC

Description:

Adjustable piston stroke machine, according to the size of the heads.

It is operated by 2 electric push-buttons at 24V, automatically returning to its position, while these push-buttons are not operated, the hydraulic circuit is without pressure, thus saving a lot of energy.

Data Sheet:

- Manufactured in stainless steel. AISI-304
- Oil tank 25 Liters
- 3 HP engine. 220/380 VZ MHZ three-phase
- Electrical operation 24 V Hermetic
- Cutting time: 3 seconds
- Approximate production: 180 heads / hour.
- Guarantees obtaining the entire brain
- Cutting blade in special stainless steel
