

DEFATTING MACHINE FOR STOMACHS

Description:

Cylindrical machine for cleaning cattle and sheep stomach's fat. Its interior with an abrasive structure allows a deep and exhaustive cleaning of the stomach, eliminating all the excess of adhered fat. It simplifies work, a valuable feature in offal machinery

Technical Data

- Made of stainless steel.
- Work with water at 65
- Watertight gasket loading and unloading gate lining.
- Internal acoustic insulation chamber.
- Centralization of the greasing points.
- Product extraction tray

Production:

P-110 DES 5,5 CV 40-60 STOMACHS / HOUR

P-510 DES 10 CV 80-100 STOMACHS / HOUR

P-710 DES 20 CV 160 STOMACHS / HOUR

Accessories

Electrical panel to control the machine functions, built under CE regulations, with electrical safety systems and emergency stop. Stainless steel thermometer for indoor water temperature inspection
