

ELECTRIC STUNNER WITH DATA LOGGER TSQ003

Description:

TSQ003 electric stunner is an efficient and practical tool for swine, sheep, bird and rabbit, and fish stunning through electronarcosis. It also allows storing the main electric parameter details for each single stunned animal, in full compliance with **1099/2009 EC regulation**.

Technical Specifications:

- IP55 waterproof containment panel made of coated steel, 35 x 50 x 20 cm
- Electronic system with microprocessor that memorizes the fundamental parameters of stunning
- Portable memory with the ability to memorize thousands of data
- Connection to the computer without the need to use cables to visualize and print the data
- Screen for the display of stunning current
- Push button configuration of the animal species to be stunned
- Memorization of the split change by push button.
- Date and time settings
- Acoustic and luminous indicator with double function:
 - Display of the minimum current level
 - Alarm due to lack of reach of the minimum current threshold
- Electrical panel with isolation and safety transformer to IEC 14-6 standard, secondary insulation class mass greater than 3KW
- Protection against overload and short circuit in the pincer and transformer supply
- Equipped with electrical adjustment of the output voltage displayed on the screen (VOLTS)
- Equipped with an electronic device that measures the impedance of the animal and prevents it from working if the programmed current is not reached
- 16A socket with 2 IP65 sealed poles to IEC standard for pincer connection
- Suitable for the use of the pliers art. TL002 and tweezers art. PZ004, PZ004L, PZ004C
